

HMC Architects Selects e-SPECS as Integrated BIM Specification Solution

InterSpec Inc. today announced that its patented e-SPECS solutions have been selected as the BIM Specification Solution by HMC Architects, one of the largest planning and design firms headquartered in California, with offices strategically located throughout California and Nevada.

InterSpec's patented e-SPECS software solutions automate the preparation of construction specifications and selection of products and materials that are incorporated into commercial construction projects. InterSpec's e-SPECS products are used by thousands of architects, engineers and construction professionals to help them keep their construction drawings and specifications in sync while reducing the overall cost of development.

"e-SPECS solutions allow architects and engineers to save countless hours and dollars while ensuring that their digital construction models and drawings agree with the specifications," said Michael Brennan, CEO of InterSpec. "Customers like HMC designing a variety of facilities including healthcare, education and government facilities use e-SPECS enabling efficient and coordinated construction document management, design team collaboration and enterprise level data management. We are pleased with the selection of e-SPECS by HMC and look forward to working closely with them on continued development of functionality around their processes."

"At HMC, we are implementing a BIM strategy firm wide. We selected e-SPECS because it is an integrated application that fits well with our goals" said Mark W. Kiker, Chief Information Officer at HMC Architects. "The integration with Revit will allow our Architects to jump start the specification process."

Joe Salazar AIA, Director of Technical Services at HMC Architects, added "We anticipate that e-SPECS will improve efficiency and enable collaborative spec writing. It will also expand our material selection process. Having it dovetail with Revit is an added bonus. We will be using e-SPECS on every project, not just Revit projects."

About HMC Architects

Throughout its history, HMC Architects has established a reputation as an award-winning design firm and thought leader for education, healthcare, and government facilities. Founded in 1940, HMC is one of the most prominent planning and design firms with offices strategically located throughout the West. To learn more about HMC Architects or to arrange interviews with the firm's executive leadership, please contact Tracy Black at (800) 350-9979

About InterSpec

InterSpec provides construction document management solutions and services built on its patented e-SPECS specification management technology. e-SPECS software automates the specification process by extracting the product and material requirements directly from the project's BIM models and drawings.

e-SPECS integrates directly with all Autodesk Revit-based BIM products as well as with Autodesk's AutoCAD, AutoCAD Architecture and AutoCAD Systems products and supports all libraries of MASTERSPEC and custom office masters.

For architects and engineers who spend many hours on every project preparing construction specifications, e-SPECS software saves time and money while ensuring that the construction drawings are coordinated with the specifications. For more information visit <<http://www.e-specs.com/>>
